

InvestTrack

User Guide — a walkthrough of every page and every data-entry form,
illustrated with sample "primedemo" data.

Screens shown use fictional demo data only — no real family financial details appear anywhere in this guide.

What is InvestTrack?

InvestTrack is a private, single-user web app that keeps track of one family's Fixed Deposits, mutual fund/share holdings, bank shares, savings account balances, LIC (life insurance) policies and health insurance policies — all of it in one place, instead of scattered across passbooks, PDFs and spreadsheets.

It answers the questions that actually matter day to day: *How much is invested in total, and what is it worth right now? What's maturing soon, and what's already overdue? Which instruments are performing best? Whose money is where?* The Dashboard answers all of these at a glance, and every figure can be traced back to the individual record it came from.

How it's organised

- **Investments** — Fixed Deposits, Shares/MF platforms, Bank Shares and Bank Balances. For FDs, Bank Shares and Bank Balances you enter the value by hand, just like an Excel sheet. Shares/MF platforms are different — see below.
- **Live holdings** — open any Shares/MF platform and add the actual mutual fund schemes or stocks held on it; their prices update automatically (mutual fund NAVs from AMFI, stock prices from Yahoo Finance), so that platform's value is always current without anyone updating it by hand.
- **Masters** — the single source of truth for who ("holders") and what ("investment names") appear everywhere else. New people or new banks/platforms are added here first, then picked from a dropdown everywhere else — this keeps a name from ever being spelled two different ways across records.
- **Redeem / Renew** — when an FD or Bank Share is cashed out, or an FD is rolled over, that history is preserved as a closed record on its own ledger, rather than being edited away or deleted.
- **LIC Policies** and **Health Insurance** — tracked alongside everything else, but kept out of the investment totals, since insurance cover isn't the same kind of money as an investment.

Who this is for

This is a private household tool, not a multi-user product — one person maintains it on behalf of the family; the people whose money is tracked (a spouse, a parent, etc.) don't log in or use it themselves. All data lives in a single file on the family's own computer or private server — nothing is shared with any third party.

How to read this guide

Every page that involves entering data is shown below with a real screenshot, filled in with fictional sample data (the "primedemo" demo login — not anyone's real information). Fields are outlined directly on the screenshot so the important ones jump out immediately:

 Red border — the field is **mandatory**; the form/API will not save without it.

Amber border — the field is **optional but important**; a "Note" nearby explains why it matters or how it behaves.

1. Getting Started — Signing In

InvestTrack only shows a sign-in screen when a username and password have been configured for it (this is done once, in the server's environment settings). On the family's day-to-day computer it usually opens straight to the Dashboard with no login at all — the screen below only appears when access is being shared more widely (for example, this demo).

The image shows a sign-in screen for 'InvestTrack'. At the top is a blue circular icon with a white symbol. Below it is the text 'InvestTrack'. There are two input fields: 'Username' and 'Password', both with red borders. Below the fields is a blue button with the text 'Sign in'.

MANDATORY Username and Password are both required to sign in — there is no "forgot password" flow; a new password is set by whoever configured the app.

2. Dashboard — Your Portfolio at a Glance

The Dashboard is the home screen and the only page that rolls everything up into one view: total money invested, its current value, and the overall gain — both for the family as a whole and broken down per person (click the + next to a name for that person's category-wise split). Below that: what's maturing soon, what's already overdue, return-on-investment by category, and the best/worst performing instruments.

There is nothing to fill in here, but two controls matter:

NOTE "↻ Refresh prices" pulls fresh mutual-fund NAVs and stock prices. It is throttled to once every 15 minutes automatically, so pressing it repeatedly won't do anything extra — and if the internet is down, the last successfully fetched prices keep being shown.

NOTE The eye icon next to each figure hides it behind dots — useful if someone is looking over your shoulder. It resets every time the page reloads.

NOTE The "Maturing within" dropdown (15/30/60/90/180 days) is remembered for next time you open the Dashboard.

3. Investments — The Full List

Every Fixed Deposit, Shares/Mutual Fund platform, Bank Share and Bank Balance the family holds lives here, filterable by type, holder and name. Once something is redeemed or renewed it disappears from this list — closed records move to their own **Redeemed / Renewed** tab (Section 11) so old money is never counted twice.

Bank Balance	Neha	Saraswat Bank	Missing	—	—	—	—	₹2,00,000	₹2,00,000

NOTE "Missing nominee only" is a quick filter to find every record that still needs a nominee filled in — worth checking periodically.

4. Add Investment — Fixed Deposit / Shares / Bank Shares

The same form adds any of the four investment types — pick the **Type** first, and the fields below it adjust. This screenshot shows a Fixed Deposit being added for demo holder "Aditya".

Maturity Value (₹) — entered manually: 537500

Nominee: Neha

Notes:

Cancel Save

MANDATORY "Name of Investment" is mandatory and must be chosen from the Masters list (Section 10) — you cannot type a new bank/platform name here. If it is not in the dropdown, add it on the Masters page first, then come back.

MANDATORY "Amount Invested" is mandatory for FD, Shares and Bank Shares.

NOTE "Holder" is optional but strongly recommended — it drives the per-person cards on the Dashboard. Like the name, it only offers values already in Masters.

NOTE For a **Shares/MF platform**, this "Current Value" field is only a placeholder — once you add live holdings (Section 6) the app switches to the live, auto-updating value automatically and this manual number is ignored.

5. Add Investment — Bank Balance

A savings account is tracked differently from the other three types — it is just a running balance, so this form shrinks to a single amount field instead of separate invested/rate/maturity fields.

Notes (e.g. account number):

Cancel Save

MANDATORY "Bank / Account Name" and "Balance" are both mandatory. Behind the scenes, Balance fills both the invested amount and the current value at once, so a bank account always shows a clean 0% gain and is never double-counted.

6. Investment Detail — Live Holdings for Shares/MF Platforms

Opening a Shares/MF-type investment (a platform like Zerodha, Groww or Kuvera) shows every scheme or stock held on it, each with its own live price, value and gain. Until at least one holding is added, the platform shows the manually entered value instead (Section 4) — this is intentional so a brand-new platform doesn't show ₹0.

MANDATORY You must search and click a result before saving — typing a name alone is not enough, and "Units held" is mandatory. The Save button stays disabled until both are done.

NOTE "Amount invested" is optional here, but without it the Gain column on this holding can't be calculated — worth filling in from your purchase statement.

NOTE For a scheme name that genuinely isn't searchable (an SGB, a delisted or illiquid micro-cap), it can still be tracked with a hand-entered price — ask whoever maintains the app to add it as an "OTHER" holding; there's no button for it in this form.

8. Redeeming an FD or Bank Share

When a Fixed Deposit or Bank Share is closed out, "Redeem" records what actually came back and — optionally — moves that money straight into a Bank Balance account you already track, so the total family total stays accurate without a separate manual entry.

The screenshot shows the InvestTrack app interface. At the top, there's a navigation bar with tabs: Dashboard, Investments, Redeemed / Renewed, LIC Policies, Health Insurance, Masters, and a user profile section (primedemo · DEMO) with a Logout button. The main content area displays the 'ICICI Bank' investment details. A modal titled 'Redeem ICICI Bank' is open in the center. The modal contains the following fields: 'Amount received (₹)' with a value of 570000, 'Redemption date' with a value of 08/06/2026, and 'Credit proceeds to' with a dropdown menu showing '— Don't credit any account —'. There are 'Cancel' and 'Redeem' buttons at the bottom of the modal. The background shows the investment details for the ICICI Bank Fixed Deposit, including the holder's name (Aditya), the amount invested (₹5,00,000), the rate of interest (7%), the investment date (10 Jul 2023), the maturity date (10 Jul 2026), and the nominee status (Missing). The annualized return is 4.5% p.a.

MANDATORY "Amount received" is mandatory (it defaults to the maturity value, but change it if the bank paid something different).

NOTE "Credit proceeds to" is optional — leave it as "Don't credit any account" if the money went somewhere not tracked in this app (cash, a different account). Once redeemed, this instrument moves off the Investments list onto the Redeemed / Renewed tab (Section 11) and can't be redeemed a second time.

9. Renewing a Fixed Deposit

Renewing doesn't edit the old FD — it closes it and creates a brand-new FD record linked back to it, so the full history (old rate, old maturity, when it rolled over) is never lost.

MANDATORY "New principal" is mandatory (defaults to the old FD's maturity value).

NOTE Rate of Interest and the two dates are optional and default sensibly (old FD's rate; old maturity date as the new investment date) — only change them if the renewal terms are different.

10. Masters — Holder & Investment-Name Pick-Lists

This is the **only** place new holder names, investment/bank names, and LIC plan names are created. Every dropdown elsewhere in the app (Add Investment, Add LIC Policy, Add Health Policy) only offers what's listed here — there is no free-text option by design, so names can never end up spelled two different ways across records.

₹ InvestTrack

DashboardInvestmentsRedeemed / RenewedLIC PoliciesHealth InsuranceMastersprimedemo · DEMOLogout

Masters

The only place new holders and investment names are created — the Add Investment form picks from these lists. Renaming updates every investment using the old value.

HOLDERS (3)

MANDATORY A new entry cannot be blank, and cannot duplicate an existing one (case-insensitive).

NOTE Renaming an entry updates every investment/policy already using the old value automatically — the "Used by" count shows how many records that will touch. Deleting is blocked while an entry is still in use ("Used by" > 0); reassign or remove those records first.

11. Redeemed / Renewed — The Closed-Records Ledger

Every instrument that has been redeemed or renewed lives here, permanently, so the history is never lost — but its figures are kept out of every Dashboard/Investments total so money is never counted twice (once as the old FD, again as the new bank balance or new FD). Two sub-tabs split Redeemed from Renewed; click any row to see the full detail, including exactly where the money went.

Notes

Demo data — mock LIC policy for the primedemo login.

Premiums Paid

+ Log Premium Payment

No premium payments logged yet — payments are tracked going forward from here.

MANDATORY "Paid On" and "Amount" are both mandatory when logging a payment (Amount defaults to the policy's instalment premium).

15. Health Insurance — The List

Mediclaime/health policies, like LIC policies, are tracked separately and excluded from the Dashboard and Investments totals.

+ Add Health Policy

POLICY NO.	PLAN NAME	TYPE	HOLDER	SUM INSURED	PREMIUM	RENEWAL DUE
51287463920	Optima Secure (HDFC Life)	Basic	Neha	₹7,00,000	₹12,500	31 Oct 2026 86d left
40195728301	Health Shield Gold (ICICI Life)	Basic	Aditya	₹5,00,000	₹9,500	14 Jan 2027 161d left
62938475610	Mediclaime Policy (New India Assurance)	Basic	Yash	₹4,00,000	₹7,200	31 Jan 2027 178d left

16. Add Health Policy

Holder comes from Masters as usual, but — unlike LIC plan names — Insurer Name and Plan Name are free text here, since there are only ever a handful of health policies across the family and a pick-list wasn't worth the overhead.

000	₹12,500	31 Oct 2026 86d left
000	₹9,500	14 Jan 2027 161d left
000	₹7,200	31 Jan 2027 178d left

Premium ₹29,200 + Add Health Policy

MANDATORY Holder, Insurer Name, Plan Name and Policy No. are all mandatory.

NOTE Sum Insured is optional but drives the totals shown on the Health Insurance list — worth filling in even if the premium/dates are still unknown.

17. Health Policy Detail — Uploading the Policy Document

Each health policy can keep its actual PDF document attached, so the physical policy copy is never far from its tracked details.

POLICY DOCUMENT

No document uploaded yet.

Upload PDF

NOTE Only PDF files are accepted. Uploading a new file when one already exists replaces it ("Replace") — there is no version history, so keep a separate copy elsewhere if the old file matters.

A Few Closing Notes

All data lives in one plain file on the machine or server running the app — there is no external database and nothing is sent to a third-party service except the live price lookups (AMFI/mfapi.in for mutual funds, Yahoo Finance for stocks), which only send the fund/stock name being searched, never any financial figures.

Because everything lives in that one file, back it up the same way you'd back up any important document — a periodic copy is enough. If prices ever stop refreshing, the app keeps working perfectly well offline using the last prices it successfully fetched.
